The essential *DocSynch* class diagram

Package docsynch.external

- Log
- interface *Editor*
- interface *EditorDocument*
- interface *IRCClient*
- interface *DCCListener*
- interface *EditorListener*
- interface *DocumentChange Listener*
- interface *DCCEvent*
- interface *IRCListener*

<<implements>>

<<private nested classes implement>>

Package docsynch.util

- LanguageUtil
- TimeoutTimer
- StringEscaper
- StringUnscaper

- interface *DocSynchListener*
- interface *DocSynchGUIListener*

- DocSynch
- DocSynch.InternalState

Package docsynch.queues

- (Thread) IRCSendQueue
- InsertQueue
- IRCReceiveQueue

- UserList
- DocumentList
- Document

- CommandClassMapper
- CommandInfo
- CommandHandler

Package docsynch.states

- interface *DocSynchState*
- *AbstractDocSynchState*
- IRCNotConnectedState
- *IRCConnectedState*
- *NotJoinedState*
- *JoinedState*
- SessionWaiting State
- NoSession State
- ClientNotJoined State
- ClientJoining State
- Client State
- Master State

<<implements>>

Package docsynch.highlight

- ChangeColors
- ChangeXMLHandler
- ChangeBlock
- ChangeManager

static

Package docsynch.optransform

- *ControlAlgorithm*
- interface *Transformer*
- GOTOAlgorithm
- TransformerException
- SPIKEInclusion Transformer
- SPIKEExclusion Transformer
- HistoryBuffer
- OperationTuple
- interface *Operation*
- StateVectorTable
- StateVector
- InsertChar
- DeleteChar
- InsertString
- DeleteString
- Identity

<<implements>>
